Re: Bristol Bay Watershed Assessment

Dear Administrator Jackson and Region X Administrator McLerran,

I write to request that you timely complete the Bristol Bay Watershed Assessment. Bristol Bay residents have lived long enough with the uncertainty created by the proposed Pebble mine, and the important scientific work reflected in your draft assessment provides critical information to inform timely decisions about such mining in our region.

I am aware that you have received requests to extend the comment period on the assessment. EPA has done an admirable job of informing the public about its assessment and the opportunity to comment on it. Further, your current sixty-six day public review and comment period equals or exceeds the review and comment periods provided by the State of Alaska in its administrative processes related to mining in Alaska and land planning in the Bristol Bay region. For comparison purposes, a summary of public comment periods for mining and land management decisions in Alaska accompanies this letter. The existing watershed assessment comment period is more than sufficient to allow for meaningful public review and participation.

Thank you again for your robust draft watershed assessment and its associated hearing and comment process. I also include for your reference our summary of hearing results, which shows that an astounding 93% of the testimony in the Bristol Bay region (80% across all hearings, Seattle and Anchorage included) supported the EPA and its watershed assessment.

Please finish your important work with due speed, and assist us in protecting Bristol Bay.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Metrokin".

Atts.
